

b00t ↗ root

What is b00t2root?

b00t2root is a virtual gathering of cyber security enthusiasts to find better solutions to real life security threats through a competitive jeopardy style CTF

Prior Versions

01

APAROKSHA CTF

The previous version of b00t2root by the name Aparoksha CTF 2017 had been a magnanimous success and has seen participation from various colleges

02

TRIHACKER CTF

A promotional event held locally at the college last year for freshmen in the name of Trihacker CTF

EVENTS

The background of the slide features a dense pattern of interlocking gears in a light gray color, creating a mechanical and industrial feel.

This time we are organizing **b00t2root** on a much **larger scale**.
We need your support to make this possible!

Why sponsor b00t2root ?

- We aim to raise awareness and expose young minds to the problem solving skills of hacking that will incline them towards the field of cybersecurity
- Sponsors will be given assistance in conducting talks and tutorials in college premises
- Name of the company will be linked with all kinds of proceedings and publicity related to b00t2root
